

TODO: WAKEUP to SEL button?
P1_8 is dedicated TCK GPIO.
Other JTAG signals shared, but not with CPLD signals (to avoid misprogrammed CPLD driving them while trying to program).
Audio streaming must be stopped, HackRF CPLD_TCK held static.

I2C Addresses on HackRF I2C bus (I2C0?):
0b1100000: Si5351C-B
MODE=0 (I2C)
I2C ADDR = 0b0011010 (CSB=0)
